Risk Management Co-Op Internship

The Co-Op Internship is an opportunity to experience the culture and atmosphere in the Firm Risk Management Division by taking on some of the responsibilities and functions of a Full-time Analyst for a short period. The internship typically lasts six to twelve months, but can vary in length depending on business needs and candidate availability.

The cornerstone of Morgan Stanley's risk management philosophy is the execution of risk-adjusted returns through prudent risk-taking that protects Morgan Stanley's capital base, liquidity and franchise.

During your Internship you will receive on-the-job training and benefit from working alongside experienced professionals on a variety of projects.

Interns will work closely with the Risk Management team to finalise departmental presentations to senior management. Interns will also compile risk data into spreadsheets, input data into systems and ensure completeness by performing reconciliations with the source.
